English

Summary

I'm a Fullstack JavaScript developer who loves building and optimizing scalable web apps. I work confidently with React, Node.js, TypeScript, and Vue.js on both frontend and backend. I enjoy tackling performance challenges, creating real-time features, experimenting with AI in development, and learning new technologies.

Work Experience

Fullstack Developer, Interien Technologies Kft.
September 2024 - September 2025

- Developed an AI-powered customer management system on both frontend and backend.
- Optimized performance under heavy load, reducing response time.
- Implemented real-time communication via WebSockets.
